

# Post Vaccine Quarantine Guidance

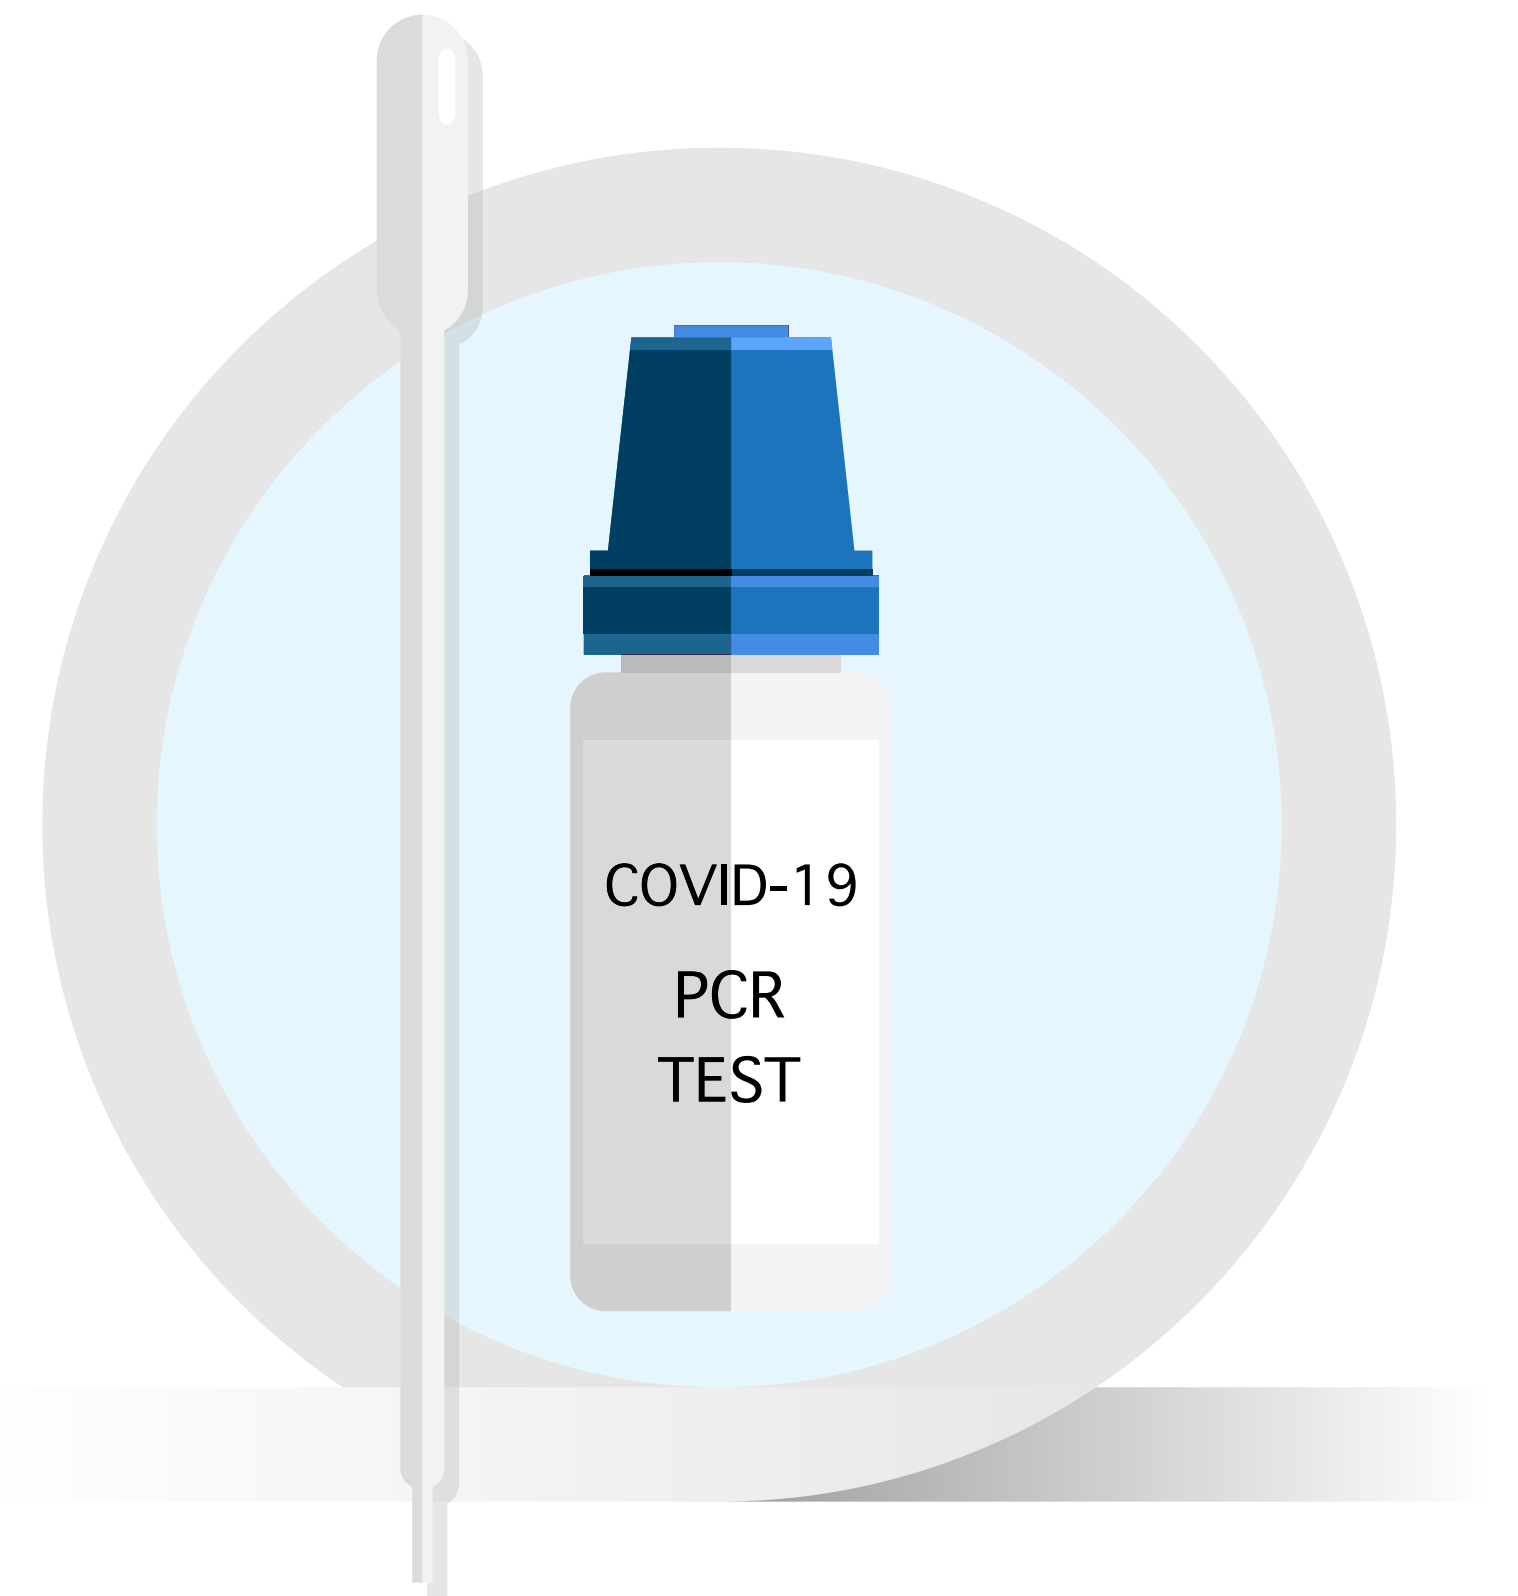

The CDC says you do not have to quarantine after exposure to someone with COVID-19 if:

It's been  
**at least two weeks** since your  
final COVID-19 vaccine dose,

And you are **showing no  
symptoms.**

However, we recommend getting  
**tested 5-7 days after exposure**  
and **monitoring for symptoms**  
for a full 14 days.

**Be sure to get your booster to maximize your protection!**
